

## SURE GRIP RECREATION

Sure Grip's push/rock hand controls have always given drivers great control of their vehicle on the road. That same great control is available off the road with Sure Grip's line of recreational controls designed to fit off-road utility vehicles. The upright position of the push/rock handle allows for superior control when heading off the beaten path.

Sure Grip also offers controls designed for popular brands of golf carts, which makes shooting 18 holes or just cruising in your golf cart easier than ever.
